To Whom It May Concern

Re: Garry Tomporowski Architect Ltd.

GTA has successfully completed three major projects for our Development Company over the last four years, in the Okanagan.

We have found their staff to be approachable, responsive and concerned about our budget objectives while at the same time meeting our design and marketing criteria. The work was always completed in a timely manner and we found that the construction documents to be thorough and complete with the field services to be firm with the trades but at the same time solution driven.

We would not hesitate to recommend them to anyone looking for comprehensive architectural services or building envelope consulting.

We would be pleased to provide further information should you wish to contact me directly.

Yours very truly

Wim Zuydervelt

President and CEO
