To Whom It May Concern

Re: Garry Tomporowski Architect Ltd.

The Little Shuswap Lake Indian Band is a very independent, progressive First Nations organization which operates and controls a variety of business interests in the forestry, tourism, real estate, and recreation sectors. A number of the initiatives are proudly conceived and financed on their own merits or with joint venture partners. Examples of these include our 71 room Quaaout Lodge and Convention Centre, the Talking Rock 18 Hole Champion Golf Course, the recently opened \$1.5 million Health and Wellness Centre, our own Fire Hall (under construction), a commercial centre and many other housing projects rivaling any Okanagan community. There are a number of other projects in the works.

Garry Tomporowski and his firm have provided design and planning services to our Band on a continual basis for nearly 15 years for these projects. During this time GTA assisted the Band in preparation of Design Briefs, Project Cost Controls, Design and Construction Administration; always keeping in mind our best interests.

Through Skwlax Construction Ltd, the Bands construction management company, GTA has assisted in bringing our projects to completion in a timely manner and assisted us in maintain our budget objectives.

Please contact me directly should you have any questions.

Yours truly

Randall Martin
Band Manager
