Re: Letter of Reference for Garry Tomporowski Architect Ltd.

To Whom it May Concern,

We first met John Schlosser and Garry Tomporowski eight years ago from a mutual friend and colleague through the professional association of ASTTBC. We presented them with a dream of a medical short term stay with ancillary service project to be located near Kelowna General Hospital.

Once I explained my true passion behind the project and why I wanted to pursue this dream, it did not take long for John and Garry to embrace the concept and dive into this project with both feet and hands!

We are and always have been very pleased with the quality of services and the professionalism of the staff. We enjoyed working with a team that recognized our needs as a community. John and Garry's door is always open. We have successfully passed our 3<sup>rd</sup> Reading on January 10<sup>th</sup> 2012, allowing our properties to be zoned in the new HD2 zone.

Through our combined synergies the team would find new ideas to implement into the design and development process. That made us feel that we had the best consultants for our project.

My husband who is also a member of ASTT has a background in CADD and was aware of the advancements in computer drafting and design in the last 10 years. John and Garry have advanced their skills such that we could see a visual renderings and walk through of the building. The end result is a very clean and professional and accurate view of the proposed development.

We would not hesitate to recommend or work with John and Garry again should the opportunity arise.

Sincerely,

Alana Marrington

Ross Marrington, AscT.
